(54) Title: INACTIVATED HOST CELL DELIVERY OF POLYNUCLEOTIDES ENCODING IMMUNOGENS

(57) Abstract: Applicants have found that an immune response can be elicited via the administration of an inactivated host cell comprising a polynucleotide encoding an immunogen. Despite the inactivation of the host cell prior to administration to the mammal, the encoded immunogen is expressed *in vivo*, apparently by the mammalian cellular machinery. The resulting immune response is specific to the encoded immunogen.
